Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restriction

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 33-64, 78-89, and 94-99, drawn to a method of treating cancer using a jatrophane compound, or derivative or salt thereof, classified in class 514, subclass 100+.
- II. Claims 33, 34, 65-69, 78-89, and 94-99, drawn to a method of treating cancer using a pepluane compound, or derivative or salt thereof, classified in class 514, subclass 100+.
- III. Claims 33, 34, 70-73, 78-89, and 94-99, drawn to a method of treating cancer using a paraliane compound, or derivative or salt thereof, classified in class 514, subclass 100+.
- IV. Claims 33, 34, 74-89, and 94-99, drawn to a method of treating cancer using a angeloyl-substituted ingenane compound, or derivative or salt thereof., classified in class 514, subclass 100+.
- V. Claims 90-93, drawn to drawn to a method of treating cancer via administering an effective amount of at least two compounds (selected from numerous compounds recited therein), classified in class 514, subclass 100+.

Art Unit: 1651

1. The inventions are distinct, each from the other because of the following reasons:

The methods of Groups I-IV each comprise the *in vivo* administration of mutually exclusive compounds thereto and, thus, are distinct and different, each from the other. The method of Group V is different and distinct from each of the methods of Groups I-IV because the methods of Groups I-IV require the administration of an effective amount of one active compound thereto, whereas the method of Group V requires the administration of an effective amount of a combination of at least two bioactive compounds. Further, the two or more bioactive compounds administered in the Group V method (from among the numerous compounds recited therein) do not necessarily include the singular compounds of any one of Groups I-IV. One would not have to practice the various methods at the same time to practice just one method alone.

The search for each of the above inventions is not co-extensive particularly with regard to the literature search. Further, a reference which would anticipate the invention of one group would not necessarily anticipate or even make obvious another group. Finally, the consideration for patentability is different in each case. Thus, it would be an undue burden to examine all of the above inventions in one application.

Applicant is advised that the response to this requirement, to be complete, must include an election of the invention to be examined even though the requirement be traversed.
